FUJI Electric Co., Ltd MICREX-F Series

Computer Link Driver

V1.4.4.0 or higher

Supported version TOP Design Studio

CONTENTS

We would like to thank our customers for using M2I's "Touch Operation Panel (M2I TOP) Series". Read this manual and familiarize yourself with the connection method and procedures of the "TOP and external device".

1. System configuration

Page 2

Describes the devices required for connection, the setting of each device, cables, and configurable systems.

2. External device selection Page 3

Select a TOP model and an external device.

3. TOP communication setting Page 4

Describes how to set the TOP communication.

Page 9

Describes how to set up communication for external devices.

5. Cable table

Page 10

Describes the cable specifications required for connection.

6. Supported addresses

4. External device setting

Page 11

Refer to this section to check the addresses which can communicate with an external device.

1. System configuration

The system configuration of TOP and "FUJI Electric Co., Ltd – MICREX-F Series" is as follows:

Series	CPU	Link I/F	Communication method	Communication setting	Cable
	F80H		RS-232C		<u>5. Cable table</u>
	F120H	FFU120B	RS-422		
	F250		RS-485	3. TOP communication	
MICREX-F	F30 F50 F60		RS-232C		
	F70 F70S F80	FFK120A-C10	RS-422 RS-485		
	F80H F81 F120 F120H F120S F200 F250	FFK100A-C10	RS-232C	<u>setting</u> <u>4. External device setting</u>	
	F70	NC1L-RS2	RS-232C		
	F70S	NC1L-RS4	RS-485		

■ Connection configuration

• 1:1 (one TOP and one external device) connection

• 1:N (one TOP and multiple external devices) connection

2. External device selection

■ Select a TOP model and a port, and then select an external device.

3. TOP communication setting

The communication can be set in TOP Design Studio or TOP main menu. The communication should be set in the same way as that of the external device.

3.1 Communication setting in TOP Design Studio

(1) Communication interface setting

- [Project > Project Property > TOP Setting] → [Project Option > "Use HMI Setup" Check > Edit > Serial]
 - Set the TOP communication interface in TOP Design Studio.

Items	ТОР	External device	Remarks	
Signal Level (port)	RS-232C	RS-232C		
		(CPU port)		
Baud Rate	9600			
Data Bit	8	3		
Stop Bit	1			
Parity Bit	Even			

* The above settings are examples recommended by the company.

Items	Description
Signal Level	Select the serial communication method between the TOP and an external device.
Baud Rate	Select the serial communication speed between the TOP and an external device.
Data Bit	Select the serial communication data bit between the TOP and an external device.
Stop Bit	Select the serial communication stop bit between the TOP and an external device.
Parity Bit	Select the serial communication parity bit check method between the TOP and an external device.

(2) Communication option setting

- [Project > Project Property > Device Setting > COM > "PLC1 : MICREX-SX Series"]
 - Set the options of the MICREX-SX Series communication driver in TOP Design Studio.

Project Option		×
Change HMI[H] Mdd PLC [A] The Change PLC[C] Change PLC[D]		
PLC Setting PLC Setting[MICREX-F Series] Option Models Setting Alas Name : PLCI Peckes Setting Deteckes Setting CCM1 (1) Peckes Setting CCM3 (0) String Save Mode : First LH HL Change Condition : ND Wireless (0) Use Reclundancy Option Models Setting Operate Condition : Primary Option Timeout 300 @ msec Set Name Set Name Set Plane Retry S Station No. 0 File Register Unuse v		
	Apply	Close

Items	Settings	Remarks
Interface	Select the TOP communication interface.	Refer to "2. External
Protocol	Select the TOP communication protocol.	device selection".
TimeOut (ms)	Set the time for the TOP to wait for a response from an external device.	
SendWait (ms)	Set the waiting time between TOP's receiving a response from an external device and	
	sending the next command request.	
Comm. Address	Enters the SX Bus Station number of the external device.	

3.2. Communication setting in TOP

* This is a setting method when "Use HMI Setup" in the setting items in "3.1 TOP Design Studio" is not checked.

■ Touch the top of the TOP screen and drag it down. Touch "EXIT" in the pop-up window to go to the main screen.

(1) Communication interface setting

■ [Main Screen > Control Panel > Serial]

Items	ТОР	External device	Remarks
Signal Level (port)		RS-422	
	K3-422	(CPU port)	
Baud Rate			
Data Bit		8	
Stop Bit		1	
Parity Bit		Even	

 * The above settings are setting $\underline{examples}$ recommended by the company.

Items	Description
Signal Level	Select the serial communication method between the TOP and an external device.
Baud Rate	Select the serial communication speed between the TOP and an external device.
Data Bit	Select the serial communication data bit between the TOP and an external device.
Stop Bit	Select the serial communication stop bit between the TOP and an external device.
Parity Bit	Select the serial communication parity bit check method between the TOP and an external device.

(2) Communication option setting

■ [Main Screen > Control Panel > PLC]

		8000	PLC	×

	and sending the next command request.	
Comm. Address	Enters the SX Bus Station number of the external device.	

3.3 Communication diagnostics

■ Check the interface setting status between the TOP and an external device.

- Touch the top of the TOP screen and drag it down. Touch "EXIT" in the pop-up window to go to the main screen.
- Check if the port (COM1/COM2) settings you want to use in [Control Panel > Serial] are the same as those of the external device.
- Diagnosis of whether the port communication is normal or not
- Touch "Communication diagnostics" in [Control Panel > PLC].
- The Diagnostics dialog box pops up on the screen and determines the diagnostic status.

ОК	Communication setting normal
Time Out Error	Communication setting abnormal
	- Check the cable, TOP, and external device setting status. (Reference: Communication diagnostics sheet)

■ Communication diagnostics sheet

- If there is a problem with the communication connection with an external terminal, please check the settings in the sheet below.

Items	Contents		Check		Remarks

			OK	NG	(For details, please refer to the PLC		
					vendor's manual.)		

Refer to the communication settings manual of the external device for configuration.

5. Cable table

This chapter introduces a cable diagram for normal communication between the TOP and the corresponding device. (The cable diagram described in this section may differ from the recommendations of "FUJI Electric Co., Ltd.")

■ **RS-422** (1:1 connection)

*Note 1) The pin arrangement is as seen from the connecting side of the cable connection connector.

6. Supported addresses

The devices available in TOP are as follows:

The device range (address) may differ depending on the CPU module series/type. The TOP series supports the maximum address range used by the external device series. Please refer to each CPU module user manual and be take caution to not deviate from the address range supported by the device you want to use.

Device	Description		Bit	Word	Size	Remarks
В	I/O relay		B000.00 - B511.15	B000 - B511	16 bit
